Topic:
Budget Model Update

Behavioral Health Redesign

Goal for Next Budget Model

Maintain Consistency:

- Fees for **E&M, Interactive Complexity, and Psychotherapy Add-ons CPT codes** are set at **100% of the Medicare fee schedule**
- Fees for services that continue from the current system including **H0006 (Case Management)** are unchanged except for **H0036 (CPST)** which was updated to be consistent with H0006
- Peer support: **\$15.51 (Individual)** and **\$1.94 (Group)**

Available for Adjustment:

- Fees for **CPT codes excluding E&M, Interactive Complexity, and Psychotherapy Add-ons - see next slide**
- Fees for **group services**
- Fees for **EBPs**

Additional State Commitment to Behavioral Health:

- Additional **\$10M** targeted for children's mental health, as previously discussed
- Additional **\$25M** targeted for fees
- Total of **\$35M** above budget neutrality point

Rate Updates Based on Revised Budget Models

Code	February 24 th Rate		Increase/ Decrease	March 9 th Rate	
	Medical BH Practitioners	Licensed BH Practitioners		Medical BH Practitioners	Licensed BH Practitioners
90791 (Psych. Diagnostic Eval.)	\$119.36	\$101.46	Increase	\$128.63	109.34
90792 (Psych. Diagnostic Eval. w/Medical)	\$99.78	NA	Increase	\$107.54	NA
90832 (Psychotherapy – 30 minutes)	\$49.78	\$42.31	Increase	\$53.65	\$45.60
90834 (Psychotherapy – 45 minutes)	\$64.72	\$55.01	Increase	\$69.75	\$59.29
90837 (Psychotherapy – 60 minutes)	\$94.94	\$80.70	Increase	\$102.32	\$86.97
90839 (Crisis psychotherapy)	\$108.12	\$91.90	Increase	\$116.53	\$99.05
+90840 (Crisis psychotherapy each addit. 30 mins)	\$51.94	\$44.15	Increase	\$55.97	\$47.57
90845 (Psychoanalysis)	\$61.14	NA	Increase	\$65.89	NA
90846 (Family psychotherapy w/out patient)	\$64.69	\$54.99	Increase	\$69.71	\$59.25
90847 (Family Psychotherapy w/patient present)	\$79.45	\$67.53	Increase	\$85.63	\$72.79
90849 (Multiple family group psychotherapy)	\$24.68	\$20.98	Increase	\$26.59	\$22.60
90853 (Group)	\$22.31	\$18.96	Increase	\$24.05	\$20.44
96372 (Ther., proph., or diag. injection)	\$16.87	\$14.34	Increase	\$18.18	\$15.45
+99354 (Prolonged service 1 st hour)	\$70.92	\$60.28	Increase	\$76.43	\$64.97
+99355 (Prolonged service each addit. 30 mins.)	\$70.39	\$59.83	Increase	\$75.87	\$64.49

All other rates remain the same since the February 24th Benefit and Service Development Work Group

Topic:
Timeline Review

Behavioral Health Redesign

Revised Transition Schedule

Key Dates

1. Specialized Recovery Services Program implementation remains 7/1/2016
2. Rendering provider requirement starts 1/1/2017 (Medicaid will not pay claims without rendering provider starting 1/1/2017)
 - a. **Practitioners should begin enrolling as soon as possible, but must be enrolled by 1/1/2017**
 - b. LICDCs can begin enrolling as practitioners 7/1/2016
3. Provider agencies may voluntarily transition to the new code set on 1/1/2017 or 4/1/2017
4. Only claims billed using the new code set will be paid for dates of service on and after 7/1/2017

Transition points

Governor's Office of
Health Transformation

Topic:
Rendering Provider

Behavioral Health Redesign

Medicaid Enrollment of Rendering Providers

- Practitioners (chart below) who are employed by MH or SUD providers should begin enrolling with Ohio Medicaid as an individual practitioner, if you are not on this list, you do not need to enroll and will receive further billing instructions in the future

Rendering Practitioners Who Must Enroll w/Medicaid	
Physicians (MD/DO), Psychiatrists	Licensed Independent Social Workers
Advanced Practice Registered Nurses	Licensed Professional Clinical Counselors
Certified Nurse Practitioners	Licensed Independent Marriage and Family Therapists
Clinical Nurse Specialists	Licensed Independent Chemical Dependency Counselors (LICDC) ** enroll eff 7/1/2016
Physician Assistants	Registered Nurses
Licensed Psychologists	Licensed Practical Nurses

Exception: Prescribers already registered with ODM as Ordering, Referring or Prescribing providers need not re-register.

- MH and SUD agencies should use the MITS self service portal to affiliate their agency with rendering practitioners listed above
- Agencies will also need to “un-affiliate” rendering practitioners listed above when necessary
- Effective for dates of service 1/1/2017, all BH Medicaid claims (both old and new code sets) must include rendering practitioner as listed above
- Example of ‘dual enrollment’ – if individual is an RN and LISW, practitioner would enroll as both provider types (requires multiple National Provider Identifiers - NPI)**

New Medicaid Rehabilitation Option State Plan Amendment Language

Behavioral Health Redesign

SPA Language Change – Psychosocial Rehabilitation

New Psychosocial Rehabilitation SPA Language

STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT
State: Ohio
LIMITATIONS ON AMOUNT, DURATION AND SCOPE OF MEDICAL AND REMEDIAL CARE
AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

13.d. Rehabilitative Services: 42 CFR 440.130(d) Continued:

Psychosocial Rehabilitation (PSR)
PSR assists individuals with implementing interventions outlined on a treatment plan to compensate for or eliminate functional deficits and interpersonal and/or environmental barriers associated with an individual's diagnosis. PSR is an individual face-to-face intervention with the individual. PSR includes restoration, rehabilitation and support of daily living skills to improve self-management of the negative effects of psychiatric or emotional symptoms that interfere with a person's daily living. PSR supports the individual with restoration and implementation of daily living skills and daily routines critical to remaining successfully in home, school, work, and community. PSR includes rehabilitation and support to restore skills to locate, rent, and maintain a home, landlord/tenant negotiations, selection of roommates (if desired by the individual), and renter's rights and responsibilities. PSR assists with the practice of the restoration of daily living skills so the person can remain in a natural community location.

Practitioner qualifications - Must be at least 18 years old and have a high school diploma with three years of applicable experience in mental health, addiction and/or foster care, or a bachelor's in social work, psychology or in related human services. Psychosocial Rehabilitation specialists in prior approved evidence-based practices performing peer work must:

- Be certified in the evidence-based practice.
- Be at least 18 years old, and have a high school diploma or equivalent.
- Self-identify as having a lived experience of mental illness as a present or former primary individual of mental health and/or SUD services.
- Be certified in the State of Ohio to provide the service, which includes criminal, abuse/neglect registry and professional background checks, completion of a state-approved standardized 16-hour on-line basic training program; completion of 40 hour peer service delivery training or 3 years of formal peer service delivery; and pass the OhioMHAS Peer Recovery Supporter exam. Training includes academic information, practical knowledge and creative activities focused on the principles and concepts of peer support and how it differs from clinical support, and tools for promoting wellness and recovery, knowledge about individual rights advocacy, confidentiality, and boundaries as well as approaches to care that incorporate creativity. Individuals with histories of criminal justice involvement are not necessarily disqualified from being a peer, but must be reviewed on a case-by-case basis.

Supervisor Qualifications - The PSR provider must receive regularly scheduled clinical supervision from a medical doctor or doctor of osteopathic medicine; registered nurse; Master of Science in nursing; clinical nurse specialist; certified nurse practitioner; independent social worker; professional counselor; professional clinical counselor; or psychologist.

PSR is designed to work with children and their families to implement interventions outlined in the treatment plan to compensate for or eliminate functional deficits and interpersonal and/or environmental barriers associated with a child/youth's behavioral health needs. This includes support in learning social skills such as positive recreational/leisure activities, developing interpersonal skills with peers, maintaining friends and supporting a positive sense of self.

Refined PSR language within the state plan amendment to elaborate on how PSR can be used to support children.

Psychosocial Rehabilitation Examples - Youth

The below are examples of PSR activities associated with youth/children:

Example #1

A child/youth is interested in playing soccer but has difficulties in socializing with other children. The child's clinician would recommend PSR in the individualized treatment plan with the intended goal of the child acquiring healthy social skills with others during soccer practice. The PSR provider assists the child in developing self-regulation techniques to prevent inappropriate outbursts during the child's soccer practice.

Example #2

Susie is a seventeen year old who is struggling with obesity. She attends outpatient therapy and developed a treatment plan with her licensed practitioner. One of the goals developed was to work on acquiring healthy wellness skills. The PSR provider has collateral contact with the licensed practitioner and is focusing on assisting Susie with meeting this goal in the community. The PSR provider works with Susie to improve her nutritional awareness and formulate a menu plan. Once a week, the PSR provider takes Susie to the local grocery store and helps her choose healthier food options when shopping.

In Scope Topics - Updates

Behavioral Health Redesign

Behavioral Health Redesign Project Scope

The below table lists the key topics that are within scope for overall BH Redesign Scope moving forward

Behavioral Health Redesign Scope

- | | |
|--|--|
| ✓ <u>Crisis</u> | • Respite |
| ✓ <u>Psychological Testing</u> | • Partial Hospitalization/Day Treatment |
| ✓ <u>Genetic Testing (E&M Services)</u> | • Opioid Treatment Programs |
| ✓ <u>School Psychologists</u> | • Group Counseling |
| ✓ <u>Nursing Activities</u> | • SUD residential |
| ✓ <u>ASAM Levels of Care</u> | • Intensive Outpatient |
| | • Peer |
| | • Pharmacists |
| | • Early Childhood, Early Intervention |
| | • MCP and Provider Interaction |
| | • High Fidelity Wraparound for Kids |
| | • Labs (including Urinalysis), Vaccines and
Provider Administered Medications |
| | • Assertive Community Treatment and
Intensive Home Based Therapy |
| | • Benefit Packages, Prior Authorization and
Continued Stay Criteria |
| | • Care Coordination |
| | • SBIRT |
| | • CPT Rate Adjustments |

Additional Guidance on Crisis

Licensed Practitioner Providing Crisis Services

If a licensed practitioner is providing the intervention, 90839 is billed. +90840 can be billed for each additional 30 minutes.

Independently licensed practitioners could provide crisis care regardless of whether or not the individual is on their case load (i.e., not requiring supervision or a recommendation of care).

Unlicensed Practitioner Providing Crisis Services

For unlicensed practitioners, crisis may only be billed to Medicaid if the recipient of the intervention is known to the system, currently carried on the unlicensed practitioner's caseload and a licensed practitioner has recommended care.

If an unlicensed practitioner is providing the service to someone on their caseload, the practitioner will bill:

- MH Crisis - IITS (H2019) or PSR (H2017)
- SUD Crisis - Individual counseling (H0004) or individual counseling IOP level of care (H0015)

Psychological Testing

The following codes were added to the rate chart and are currently covered under Medicaid, today (will continue post January 2017):

96101

96111

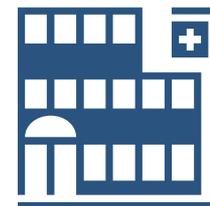

96116

96118

Additional Rate and Limitation Guidance

Code	Description	Limitation	Rate
96101	Psychological testing with interpretation and report, per hour.	8 hours/year, any combination of the four psychological testing codes	\$59.26
96111	Developmental testing; extended with interpretation and report		\$56.11
96116	Neurobehavioral status exam per hour of the psychologist's or physician's time, both face-to-face time with the patient and time interpreting test results and preparing the report		\$64.10
96118	Neuropsychological testing battery with interpretation and report, per hour		\$78.31

Genetic Testing

Physician determines genetic testing is necessary and orders it

Collection of cheek cell sample is obtained as part of a medical service appointment (Evaluation and Management Office Visit)

Sample sent to and analyzed by a CLIA certified lab (not waived)

Collection of the cheek swab that is needed to perform genetic testing does not have a separate code.

School Psychologist

Key Considerations for School Psychologists

School Psychologists employed by a Behavioral Health Agency would act within their scope and bill as any other unlicensed behavioral health practitioner (i.e. masters level practitioners).

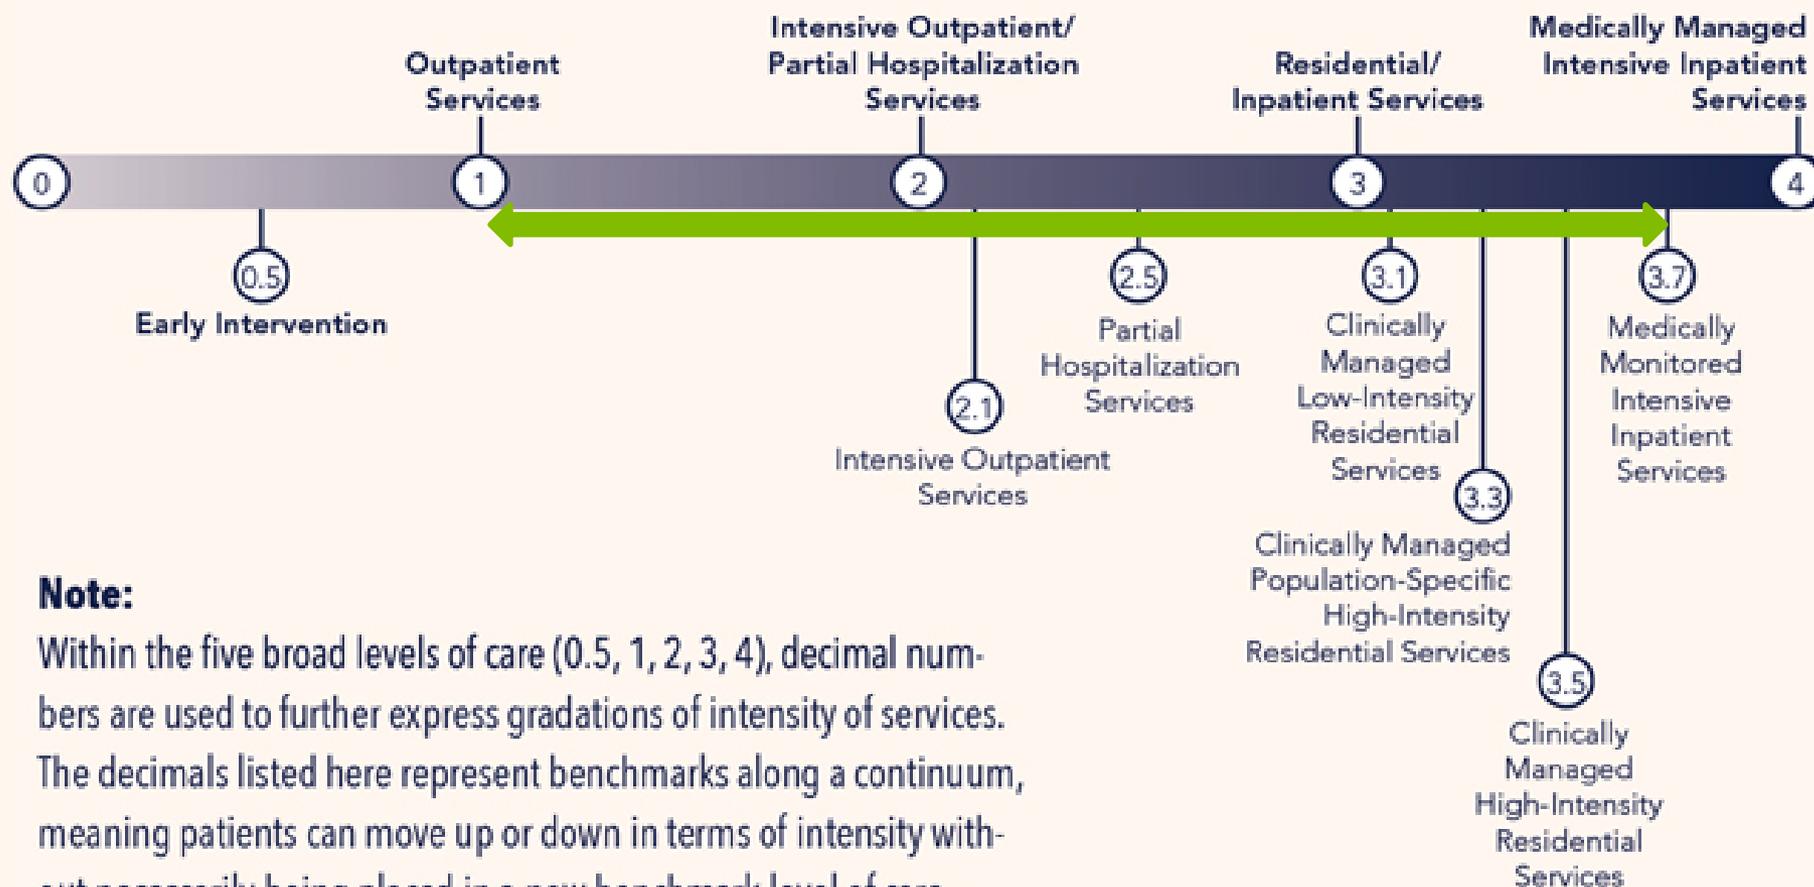

<http://www.school-psychologists.com/state/ohio-school-psychologist-certification.html#education>

Ohio Administrative Code 4732-5-02 (Exemptions from licensure requirements)

4732-5-02 (A) A person who holds a license issued by the state board of education authorizing the practice of school psychology, while practicing school psychology within the scope of employment by a board of education or by a private school meeting the standards prescribed by the state board of education under division (D) of section [3301.07](#) of the Revised Code, or while acting as a school psychologist within the scope of employment in a program for children with disabilities established under Chapter 3323. or 5126. of the Revised Code. A person exempted under this division shall not offer psychological services to any other individual, organization, or group unless the person is licensed by the state board of psychology;

ASAM Levels of Care

REFLECTING A CONTINUUM OF CARE

Note:

Within the five broad levels of care (0.5, 1, 2, 3, 4), decimal numbers are used to further express gradations of intensity of services. The decimals listed here represent benchmarks along a continuum, meaning patients can move up or down in terms of intensity without necessarily being placed in a new benchmark level of care.

The green double ended arrow represents scope of Levels of Care in Redesign.

Registered Nurses and Licensed Practical Nurses

For services provided on and after January 1, 2017, three CPT/HCPCS codes will be available for nursing activities rendered by RNs or LPNs as a replacement for MH pharmacological management (90863) and SUD medical/somatic (H0016) for all agencies, there will be no exceptions:

Behavioral Health Codes for Nursing Activities

H2017

99211

H2019

Key Takeaways

- 1 Registered Nurses and Licensed Practical Nurses will need to enroll with Ohio Medicaid because they will be expected to be a rendering provider
- 2 Rendering type and education will be what drives this rate
- 3 These codes and the associated rates will be used during rate setting methodology

Added to State Plan Amendment (IITS): Nursing assessments and group medication education may only be performed by a registered nurse or a licensed nurse practicing with a Bachelor's degree within their current scope of practice.
