

Medicaid Data Conversion: Follow Up

This is a follow-up note to the [July 29 issue](#) of MITS BITS: Medicaid Data Conversion Occurs This Weekend.

Active Medicaid coverage is now in place for a significant majority of the individuals who met Medicaid “spend down” between August 2015 – July 2016.

However, there are a number of individuals who did meet “spend down” during this timeframe who are not showing up as active Medicaid in MITS. A state level fix team is working on a correction that will establish active Medicaid coverage for these individuals. This work will be completed not later than August 20, 2016.

In the meantime, if you identify individuals who have immediate access to care issues, please contact OHP.Compliance@medicaid.ohio.gov as instructed in the [July 29 issue](#) of MITS BITS.
