

## Behavioral Health MITS Portal Training Registration

### MITS Portal Training for Behavioral Health Providers - Friday, January 5th, from 1pm-3pm

The Ohio Department of Medicaid (ODM) will host a webinar for community behavioral health providers on how to submit Medicaid claims using the MITS portal on Friday, January 5<sup>th</sup>, from 1pm-3pm. The webinar will give an overview of how to submit Medicaid claims using the MITS Portal. This information may be especially helpful for agencies that need a bit more time to update their electronic billing systems to submit EDI transactions using the new Medicaid behavioral health code set and policies. All community behavioral health providers are able to bill for services to non-MyCare Medicaid enrollees using the MITS portal. MITS provides a “copy” feature that speeds up data entry. Feedback on a claim submission is immediate and payment for successfully submitted claims will occur during the next billing cycle, usually the next calendar week. The MITS portal can also be used to correct denied claims, adjust or void paid claims.

To register for the Behavioral Health MITS Portal Training please use the following link:

<https://attendee.gotowebinar.com/register/5517511364206893826>. After registering, you will receive a confirmation email containing information about how to join the webinar. The webinar and its slide presentation will be recorded and posted to the BH.Medicaid.Ohio.Gov web site [here](#). In addition, providers can also review existing guidance on using the MITS portal currently available on the ODM website [here](#).
